

The World's leading supplier of fine quality,
aggressively priced electronic hardware.

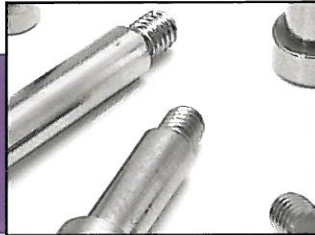

STANDOFFS

Standoffs are commonly used for PCB mounting and many other applications that require creating distance and/or fastening equipment. Male-Female, Female, Male-Male and Swage type are available in hex, round and square profiles.

SPACERS

Typically used in circuit board mounting applications and offered in a wide variety of sizes. Swage configurations are also available.

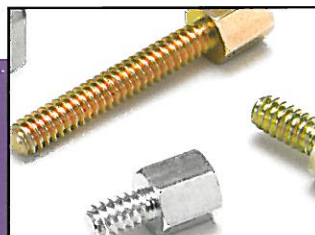

SHOULDER SCREWS

Shoulder Screws are available in socket head and screw driver slot profiles. They are manufactured with exacting tolerances for use in precision applications. Undercuts under head assures perfect seating for low friction assembly.

CAPTIVE SCREWS

During front panel assembly, hardware can easily be lost. Fascomp's captive hardware assures you of simple and secure mounting. A wide variety of Captive Screw and Retainer styles are available.

JACKSCREWS

Widely used in D-Sub cable connections. Choose from various sizes and materials. Add hardware consisting of 2 flat washers, 1 lock washer and a 4-40 nut.

THUMBSCREWS

Attractive and easy to grip for simple installation to front panels with no tools required. A wide variety of styles and sizes to choose from.

HANDLES

Fascomp's line of instrumentation handles are both aesthetically pleasing as well as easy to install. You may choose to add Ferrules for reinforcement when heavy equipment is involved.
